

# Prioritizing global health resources: using cost-effectiveness analysis

**Thursday, July 19th**

**12:00 p.m. – 1:00 p.m. EDT**

Cost-effectiveness analysis can help decision-makers gain a better understanding of the value of investments of global health interventions.

Hosted by the Center for the Evaluation of Value and Risk in Health (CEVR), this webinar will explore global health resource prioritization and how stakeholders can leverage global cost-per-DALY averted findings to make resource allocation decisions. We will also show researchers a tool for converting clinical outcomes to DALYs to use in economic models.
