## CENTERS FOR DISEASE CONTROL AND PREVENTION (CDC) COALITION

C/o American Public Health Association (202) 777-2514 www.cdccoalition.org

March 30, 2017

The Honorable Roy Blunt Chairman Senate Appropriations Subcommittee on Labor, Health and Human Services, Education and Related Agencies Washington, DC 20510

The Honorable Tom Cole Chairman House Appropriations Subcommittee on Labor, Health and Human Services, Education and Related Agencies Washington, DC 20515 The Honorable Patty Murray Ranking Member Senate Appropriations Subcommittee on Labor, Health and Human Services, Education and Related Agencies Washington, DC 20510

The Honorable Rosa DeLauro Ranking Member House Appropriations Subcommittee on Labor, Health and Human Services, Education and Related Agencies Washington, DC 20515

Dear Chairmen Blunt and Cole and Ranking Members Murray and DeLauro:

The undersigned 182 members of the CDC Coalition and other supporting state and national organizations urge you to provide at least \$7.8 billion for the Centers for Disease Control and Prevention's programs in the FY 2018 Labor, Health and Human Services, Education and Related Agencies Appropriations bill. We are deeply disappointed that President Trump's initial budget proposal recommends an astounding \$15.1 billion or nearly 18 percent cut to the Department of Health and Human Service's budget for FY 2018. While the president's budget blueprint does not provide specific funding levels for CDC, given the size of the proposed cut to HHS, it is clear that funding for every HHS agency and program would be at risk under his proposal. We believe that Congress should prioritize funding for all of the activities and programs supported by CDC. CDC programs are essential to protect the health of the American people. Furthermore, we are deeply concerned about efforts to repeal the Prevention and Public Health Fund, authorized by the Affordable Care Act, and the impact the loss of this funding would have on CDC's annual budget. The Prevention and Public Health Fund currently accounts for 12 percent of CDC's budget and Congress must ensure that CDC's budget remains whole in the face of efforts to repeal the ACA.

The CDC Coalition is a nonpartisan coalition of organizations committed to strengthening our nation's public health infrastructure and prevention programs. Our mission is to ensure that health promotion and disease prevention are given top priority in federal funding, to support a funding level for CDC that enables it to carry out its prevention mission and to assure an adequate translation of new research into effective state and local programs. Coalition member groups represent millions of public health workers, researchers, clinicians, educators, and citizens served by CDC programs.

CDC serves as the command center for the nation's public health defense system against emerging and reemerging infectious diseases. From aiding in the surveillance, detection and prevention of the Zika virus to playing a lead role in the control of Ebola in West Africa and

detecting and responding to cases in the U.S., to monitoring and investigating last year's multistate measles outbreak to pandemic flu preparedness, CDC is the nation's – and the world's – expert resource and response center, coordinating communications and action and serving as the laboratory reference center. States, communities and the international community rely on CDC for accurate information and direction in a crisis or outbreak.

CDC is faced with unprecedented challenges and responsibilities ranging from emergency preparedness, chronic disease prevention, to combating the tobacco and obesity epidemics. CDC funds programs for injury control and violence prevention; global health security; health promotion in schools and workplaces; the prevention of diabetes, heart disease, stroke, cancer, lung disease and other chronic diseases; nutrition and physical activity; immunization; environmental health, including the prevention of childhood lead poisoning; oral health; reducing health disparities; preventing infant mortality and birth defects; preventing antimicrobial resistance; preventing prescription drug overdose and public health research and health statistics. It is notable that more than 70 percent of CDC's budget supports public health and prevention activities by state and local health organizations and agencies, national public health partners and academic institutions.

In addition to ensuring a strong public health infrastructure and protecting Americans from public health threats and emergencies, CDC programs are crucial to reducing health care costs and improving health. Despite the progress CDC has made to meet these needs, the agency's programs have been woefully underfunded to confront the myriad public health issues facing the nation. We urge you to support a funding level of at least \$7.8 billion for CDC programs in FY 2018.

Please contact Don Hoppert at <u>donald.hoppert@apha.org</u> or 202-777-2514 with any questions regarding our request.
